

Application-

Your Praise is a three layer strip- pre-spaced and ready to go on the wall. It will generally come to you in a roll-lay the Praise out on a flat surface and rub it on both sides with your Application Tool- First on the back-looks like graph paper, and then on the mask tape side. This ensures the Praise to stick to the masking tape part of the Praise.

Clean and dry your surface-don't use harsh chemicals-just soap and water.

Still laying on flat surface, place masking tape along the bottom of your Praise, and 2 pieces at each corner.

Wall Preparation-using tape put a guideline on wall-level the

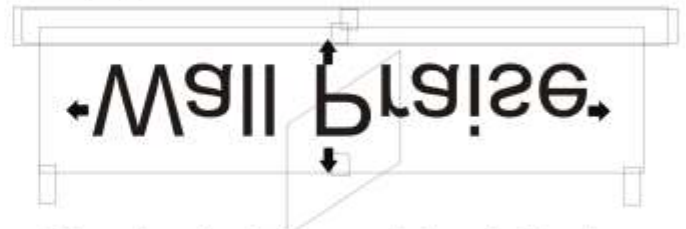

tape, and put a guide mark at the center of the tape.

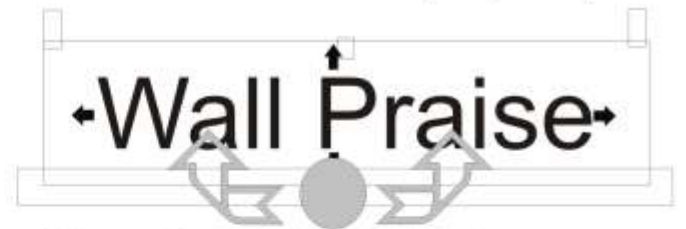

Move Praise from flat surface and align your arrows to center-check level across arrows to make sure you are level. Rub one more time over Praise.

Your tape will act as a hinge- Flip your Praise down.

Slowly start to peel back Praise at a 45 degree angle-checking that the vinyl Praise is completely adhered to the sticky tape layer.

Place Praise back in place on the wall-working from the center out. Rub all letters well on wall. Now it's time to peel off the tape and reveal your masterpiece!

At a 45 Degree angle, remove the mask tape from your Praise. Wall Praise sticks well to most flat surfaces. Don't forget to remove the leveling arrows. Use the corner of your application tool to take them off.

Now...enjoy and show it off!
